## Bilateral Meetings

- Day 1
- Day 2

### Description

AgroVIR is a farm management software solution provider currently operating in:

Hungary, Romania, Argentina and Bulgaria.

Our software enables farmers to automate their work operations and to track important information (records of chemicals, fertilisers used, information on tillage, accurate calculation of expenses and yields) on the farm that helps them in decision-making.

The Hungarian based company was founded 10 years ago and today it is known as the clear market leader in this country. It is used by 250 clients on 360.000 hectares in total. AgroVIR dominates its primary market with 30% coverage.
